HR Analytics Report

Active Employees	18,285
Working Remotely	25.02%
Working at HQ	74.98%
Average Age	38.47 yrs

Hiring Trend

Hiring has held steady at roughly 1,050-1,150 new employees per year since 2001, with 2000 reflecting a partial first year (220 hires) and 2020 showing a modest dip (1,012), plausibly a pandemic effect.

Gender Distribution

The active workforce is close to gender-balanced: Male 50.81% (9,328), Female 46.46% (8,455), and Non-Conforming 2.72% (502).

Employees by State

Ohio accounts for 14,788 of the 18,285 active employees (~81%), reflecting the company's headquarters location. All remaining states each represent under 6% of headcount.

Employees by Race

White is the most represented group (28.5%), followed by Two or More Races (16.3%), Black or African American (16.3%), and Asian (16.1%), with the remaining three categories each between 5% and 12%.

Employees by Department

Engineering is the largest department (5,501), followed by Accounting (2,747), Human Resources (1,498), and Sales (1,497). Auditing (40) and Legal (248) are the smallest.

Insights & Recommendations

WORKFORCE OVERVIEW

- Active workforce of 18,285 employees (of 22,214 total records ever hired).
- Average age is 38.47 years.
- 25.02% work remotely vs. 74.98% at headquarters.

HIRING TRENDS

- Hiring has been stable at ~1,050-1,150/year since 2001; no growth or contraction phase evident.
- 2020 shows a modest dip (1,012), plausibly a pandemic-related effect.

DIVERSITY - GENDER

- Largest group: Male (50.81%). Distribution is close to balanced across all three categories.

DIVERSITY - RACE

- White is the most represented group (28.5%); no single group holds a majority.

DEPARTMENTS

- Largest department: Engineering (5,501 employees).
- Smallest: Auditing (40 employees), followed by Legal (248).

GEOGRAPHY

- Top state for headcount: Ohio (14,788), ~81% of the active workforce.

RECOMMENDATIONS

- Evaluate geographic concentration risk given Ohio's 81% share of headcount, and whether expanding remote/secondary-location hiring reduces exposure.
- Track gender/race balance on a recurring cadence to catch drift early rather than relying on a single snapshot.
- Review staffing depth in Legal and Auditing to confirm adequate coverage for compliance-critical functions.
- Budget hiring predictably: a stable ~1,100/year pace for two decades supports steady-state, not high-growth, recruiting capacity planning.

LIMITATIONS & SCOPE NOTES

- All KPIs reflect active employees only, defined as records with no termination date (NULL or blank).
- The dataset contains a number of future-dated termination values (e.g. termination dates in 2029). This report treats those as terminated/inactive, consistent with the underlying SQL filter (termdate IS NULL OR termdate = " "). Treating future-dated terminations as still-active instead would raise the active headcount to approximately 19,300-19,400 — a scope decision worth confirming with whoever maintains the source data.
- The Hiring Rate by Year chart reflects all employees ever hired (active and terminated), since a hiring-rate metric is most meaningful across every hiring event rather than only current staff.
- This analysis is descriptive, not predictive: it explains the current and historic workforce but does not forecast attrition or model its drivers.
